

NWCG CURRICULUM MANAGEMENT ISSUE PAPER #134
REMOVAL OF S-260 INCIDENT BUSINESS MANAGEMENT INSTRUCTOR-LED
TRAINING COURSE FROM THE NWCG CURRICULUM
April 27, 2016

BACKGROUND

In June 2011, the online version of S-260 Incident Business Management course was published through the NWCG learning management system hosted at the National Fire Academy. The September 2005 instructor-led training course remained in the Publication Management System, but has not been revised.

CURRENT STATUS

Due to updates in the Incident Business Management Handbook, both the online and the instructor-led training courses are outdated.

RECOMMENDATION

It is the recommendation of the NWCG Training Development Program and the Incident Business Committee to remove the instructor-led S-260, Incident Business Management course and associated components from the NWCG curriculum. This effort will reduce revision costs, and ensure all students receive the same knowledge by completing the online training.

Effective date for removal will be October 1, 2016.
