

NWCG CURRICULUM MANAGEMENT ISSUE PAPER NUMBER 36
NUMBERING OF THE HELICOPTER MANAGER WORKSHOP
June 11, 2002

BACKGROUND

At the Fall 2001 NWCG meeting in Bar Harbor, Maine, NWCG approved the proposed resolution developed by the IOSWT and the Interagency Helicopter Operations Group regarding the Helicopter Manager Position.

CURRENT STATUS

Part of the agreed upon resolution was the adoption of a required Helicopter Manager training course and the Helicopter Manager Workshop into the PMS 310-1. As a result of prior guidance set by the IOSWT and the TWT, all courses within the PMS 310-1 are required to be given a course number.

RECOMMENDATIONS

It is the recommendation of the NWCG Development Unit that the course and the workshop be given the same number with a different letter designator.

S-372 Helicopter Manager

RT-372 Helicopter Manager Workshop

The "RT" designator, recurrency training, will be a new designator within NWCG course numbering system. Within this designator we will be able to number workshops, refresher training and other miscellaneous courses requiring recurrency.

ACTION REQUIRED

Approval of this recommendation will result in a number being given to the Helicopter Manager course and the new "RT" numbering series proposed above.
